Experience

2019 - 2025

CVS | Moderna | Aura | HqO | MB Technologies

Software Engineer (Various Roles)

- Partnered with product managers, stakeholders, and end-users to translate business requirements into technical solutions, ensuring alignment with strategic goals.
- Designed and implemented data-driven applications and APIs that improved workflows, system integrations, and reporting accuracy.
- Delivered visualizations, dashboards, and front-end solutions that enhanced usability and informed decision-making.
- Collaborated across product, design, and development teams in Agile/Scrum environments, contributing to multiple high-impact product launches.
- Strengthened software quality and scalability by applying testing, accessibility, and performance best practices.

2017 - 2019

Interconn Resources

Director

- Acted as a liaison between IT and business leaders, ensuring ERP solutions aligned with organizational needs.
- Delivered training and adoption programs that improved efficiency and standardization across teams.
- Implemented ERP-based invoicing workflows, reducing errors and accelerating billing cycles.

2015 - 2017

Jemison Metals

Contract Analyst

- Managed \$50M in revenue and consistently achieved a 20% gross margin (industry average 15%) through analysis of operational efficiency, purchasing, and sales strategies.
- Produced and presented monthly analytics reports for executives, highlighting profitability opportunities and market trends.
- Supported strategic decision-making by identifying new sales strategies and performance improvements through data analysis.
